World Wildlife Day Spotting Sheet

Celebrating Surrey's special wildlife

Surrey is home to some nationally scarce mammals, birds, insects and reptiles, thanks in part to being England's most wooded county.

You'll find ancient woodland, home to 1,000-year-old yews, wet woodland characterised by willow, birch and alder, and lowland mixed oak and ash woods, a typical sight across the Surrey Hills.

See what woodland wildlife you can spot as you explore the Surrey countryside.

We are Surrey's countryside charity.

We're passionate about making our countryside a better place for everyone to live, work and enjoy.
